

## So Big And Yet So Small!

Seen by itself, Swift & Company is one of the largest manufacturers and distributors of animal food products in the country.

Seen in relation to the total food business of the world, its size diminishes to small proportions.

We handle only about 22 per cent of the total output of the hundreds of packing plants under federal inspection, and only about 12 per cent of the total meat supply of the nation.

We handle only about 6 per cent of the total quantity of butter, eggs, and poultry sent to market in the United States.

Our tanneries handle less than 15 per cent of the hides made into leather in the United States.

Our soap factories make less than 10 per cent of the soap output of the nation.

This is done in keen and open competition with every concern handling these products, and at a profit of a fraction of a cent per pound.

In the meat packing industry there is no one dominant concern handling a large proportion of the output.

### DOUGLAS SUCCEEDS CLOPTON AS JAILOR AT COUNTY JAIL

Jailor A. H. Clopton resigned his position last Saturday. It was learned yesterday, after a disagreement with Sheriff J. C. Van Pelt over details of the work in the jail. Last night the sheriff installed D. D. Douglas in the vacant position. Mr. Douglas and the sheriff have been personal acquaintances and friends here in Escambia

county for nearly 35 years and Mr. Van Pelt expresses himself as satisfied that he has chosen a man who will make a satisfactory record in securely confining and properly caring for the county's prisoners.

### When My Baby Was Sick

I SHALL never forget that dreadful day when I wondered if anything would ever agree with my baby. Of course, I had tried to nurse him, as every mother should. And we had tried almost everything, it seemed—but he wouldn't gain weight or have the pink cheeks I prayed for.

And then our old doctor said "Let's try Nestlé's Milk Food." You know that it is made out of milk—it's the nearest thing in the world to mother's milk. They add cereal and sugar to it—just the right amount—and the tough milk curds are broken up and easier to digest.

As I write, a sturdy, two-year old plods gravely up to me and the dreadful day seems far away—for my baby is well.

Nestlé's is very easy to prepare

Nestlé's is pure milk in powder form that is already modified and does not require the further addition of milk. Always pure and safe, always uniform and free from the dangers of home modification, Nestlé's has stood the test of three generations and has today the largest sale of any baby food in the world.

FREE! Enough Nestlé's for 12 feedings. Send the coupon!

### Found Dead In Bedroom

Unusual Experience of Georgia  
Lady Which Created  
Sensation

Last Wednesday night, Mrs. Julia Brown, who lives in Georgia, near the Florida line, found about fifty malarial mosquitoes dead in her bedroom. She was very much surprised. Upon investigation she learned that her room had been sprayed with "Torment" the afternoon before by her son. "Torment" is a new preparation put out by The G. B. Williams Company, Quitman, Georgia, and is creating quite a sensation all over the south. It is deadly to flies, mosquitoes, ants, fleas, lice, mites, bedbugs, roaches, etc. It has a pleasant odor, will not soil clothing nor furniture, and is absolutely harmless to human beings. "Torment" is put up in 25c bottles. Sold by dealers everywhere.—adv.

### Coming Events Cast Their Shadows

Prepare Now to Withstand the Crisis.

Do not anticipate with a shuddering dread the beautiful event of childbirth. You can avoid discomfort during the period and strain at the crisis by preparing your system and putting yourself in splendid condition to meet the time-honored and famous remedy, Mother's Friend. It is prepared to give the mother-to-be that direct help she needs. The muscles, nerves, tendons and cords are made and kept soft and elastic. Thus strain is avoided, and as a result nervousness, nausea, bearing-down and stretching pains are avoided.

The abdominal muscles expand easily and gently when baby is born. Naturally, pain is less and the hours are fewer. The system is prepared and the crisis is one of much less danger. Write the Bradford Regulator Company, Dept. M, Lamar Building, Atlanta, Georgia, for their helpful Motherhood Book, and obtain a bottle of Mother's Friend from the druggist today. It is just as standard as anything you can think of. And remember, there is nothing to take the place of MOTHER'S FRIEND.

### AUTHORITIES NOW SHOW JUST WHAT TANLAC REALLY IS

Many Facts of Interest Are Now  
Given to the Public  
Regarding It

In a recent issue of this paper an announcement was made that Tanlac now has the largest sale of any medicine of its kind in the world, and that more than twelve million bottles had been sold during the past four years.

These are unusual figures, and the question naturally arises in the mind of the reader why this phenomenal success and why has this preparation so far outstripped all other medicines of its kind. It is only natural, therefore, that the manufacturers should offer some explanation to satisfy public interest.

In the first place, Tanlac is manufactured in one of the largest and most modernly equipped laboratories in this country. Its formula is purely ethical and complies with all national and state pure food and drug laws. Altogether there are ten ingredients in Tanlac, each of which is of recognized therapeutic value.

Many of these ingredients have been individually known and used since civilization first began, and some of them have been used and prescribed by leading physicians everywhere, but until they were brought together in proper proportion and association as in the Tanlac formula, humanity had not heretofore realized their full value and effect.

In referring to one of the more important ingredients of Tanlac, the Encyclopedia Britannica says: "It has long been the source of the most valuable tonic medicines that have ever been discovered." In referring to others of the general tonic drugs contained in Tanlac the 13th Edition of Pomeroy's Therapeutics, a standard medical text book, states that—"they impart general tone and strength to the entire system, including all organs and tissues."

This same well-known authority in describing the physiological action of still another of the ingredients of Tanlac which is of value in treating what is commonly known as "a run-down condition" uses the following expression: "It is highly esteemed in loss of appetite during convalescence from acute diseases."

There are certain other elements in Tanlac which because of their influence upon the appetite, digestion, assimilation and elimination improve the nutrition and vital activity of all the tissues and organs of the body, and produce that state of general tonicity which is called health.

In discussing another ingredient the Encyclopedia Britannica says: "It is one of the most efficient of that class of substances which act upon the stomach so as to invigorate digestion and thereby increase the general nutrition. It is useful in dyspepsia, chlorosis, anemic and various other diseases in which the tone of the stomach and alimentary canal is deficient." Concerning still another ingredient, this same standard authority says: "It causes dilation of the gastric blood vessels, increases secretion of the gastric juice, and causes greater activity in the movements of the muscular layers in the walls of the stomach. It also tends to lessen the sensibility of the stomach, and so may relieve gastric pain."

The United States Dispensary makes the following comment regarding another ingredient: "It may be used in all cases of pure debility of the digestive organs or where a general tonic impression is required. Dyspepsia, atonic gut, hysteria, and intermittent fever are among the many affections in which it has proven useful."

There are certain other ingredients described in the Dispensary and in other standard medical text books as having a beneficial action upon the organs of secretion, whose proper functioning results in the purification of the blood streams passing through them. In this manner objectionable and poisonous ingredients of the blood are removed, and the entire system is invigorated and vitalized.

Tanlac was designed primarily for the correction of disorders of the stomach, liver and bowels. At the same time, however, it is a powerful reconstructive tonic and body builder, for it naturally follows that any medicine that brings about proper assimilation of the food and the thorough elimination of waste products must therefore have a far-reaching and most beneficial effect upon the entire system.

Although Tanlac's claim for supremacy are abundantly supported by the world's leading authorities, it is the people themselves who have really made Tanlac what it is. Millions upon millions have used it, and have told other millions what it has done for them. That is why Tanlac has come the real sensation of the drug trade in this country, and that is also why it is the most widely talked-of medicine in the world today.

Tanlac is sold by leading druggists everywhere.

If the Shah of Persia were to be deprived of his income he would still be one of the richest men in the world. He would only have to sell his ornaments, gems, and precious stones to become possessed of about \$35,000,000.

### LIBELS ARE FILED IN NUMBER LIQUOR SEIZURE CASES

The federal authorities have taken over the dozen quarts of Cuban cognac which the police captured several weeks ago from barge captain Sorenson, and which was held at the jail when Sorenson was released. The anxiety in some quarters as to whether or not this liquor would reach the custody of the county officials or not has thus been relieved.

Other liquor seizures were also officially made yesterday when District Attorney John L. Neely filed libels against the following:

F. Banks, master of the schooner C. H. Hackley, 31 gallons of liquor. This was seized by the sheriff of Bay county at Panama City several weeks ago.

M. M. Yates, master of the schooner "Beatrice," 2 1/2 gallons of rum.

Skipper Vulcanizing Company, of York, Penn., 21 gallons of whiskey.

This is the whiskey which was seized a few weeks ago at the plant of the McCann Vulcanizing Co. Investigation which was conducted at the instigation of the management of the local vulcanizing plant revealed that no one connected with the business was in any manner responsible, but that the name of the business had been used by some one else who had evidently intended calling on the express company for the shipment in the name of the concern which was the innocent victim.

Upon receipt of the shipment the express company sent it immediately to the vulcanizing concern here before the party who had really ordered it had had time to call for it. It is asserted, and upon receipt at the place of business of the vulcanizing company the management immediately notified the U. S. marshal's office of the contraband goods.

### REPORT MADE BY U. S. EMPLOYMENT BUREAU FOR WEEK

The local U. S. Employment Bureau has rendered the following report of the activities of this office for the past week:

"For the week ending June 14th 37 transfers were received, all of which
